Smart Hospitality Core Value Proposition

Smart Hospitality is a card-present solution designed for the hospitality industry, the app offers a range of features to help hospitality venues improve productivity while decreasing errors, increase tipping opportunities, and give customers more flexibility when paying.

Highlights

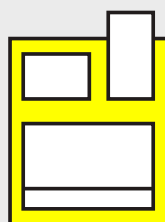

Enables customer to take both **Over the Counter** or **Pay at Table** payments. Works in standalone mode or can be integrated into most point of sale systems. Simple self-service integration into point of sale, product is fully supported by Doshii. App available on the CM5 Smart terminal and is **free** for CBA Customers.

Key Features

Pay at Table Functionality

When integrated, payments are passed back to the point of sale (POS), removing the need for the waiter to return to the POS to close the table.

Quick Sale - POS Initiated Payments (PIP)

When integrated, waiters can push payments from the POS to the Smart Terminal, removing the need to manually enter payments, reducing errors.

Split Bills

Customers can split the bill by amount, number of people, or even by item (when integrated to the POS).

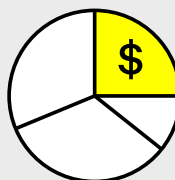

Digital Receipts

Customers can opt to receive their receipts by email or by scanning the QR code on the screen to open a digital copy of their receipt in their mobile browser.

Customisable Tipping

Venues can set their desired tipping amounts to best suit the customers expectations of the venue.

Real-Time Transaction Portal

Access your venues transaction and order data in real time on the terminal, or via the Smart Hospitality online portal.

Get in touch to confirm your eligibility today.

Brought to you by Commbank and available to a growing list of POS partners.
